About me

As an industrial designer the influence of a product on it's user and vice versa is the most important part of design to me. Every detail shapes the way the user interacts with it. I try to emphasise those details to create meaningful products.

I am motivated to break fresh ground and to develop innovative ideas and products.

Interests

Traveling, (making) music, cooking, film & theater, skiing, jogging, technology & innovation

Education

- 2008 Abitur (high-school diploma)
